Many major cities in the world today have large populations of people who have recently arrived; they have emigrated from other countries. People are living longer in the United States. As a result, more and more middle aged adults are becoming caretakers of their aging parents. When their parents can no longer care for themselves, these adults stay at home to care for them in much the same way they cared for their own children.

Playing the role of "parent sitter" is quite difficult and frustrating. For example, an aging parent may become blind. No longer able to see, the old person needs his or her children to perform many every day jobs. Another example is the parent who becomes brain damaged during the aging process. We owe our nation's state park system to one of the world's most recognizable landmarks -Niagara Falls. By 1880, a ring of industrial sites and man-made attractions had so completely choked off public access to the falls that the only views from American soil were on private land. News of Niagara's plight spread when a group of artists and politicians spearheaded a campaign to buy back the land, creating a preserve. Finally in 1885, after six years of legislative wrangling, New York Governor David B. Hill dedicated the famous landmark "free to mankind", and our state park system was born.

America's parks really took off in the 1930's when the country was booming with public works projects. The Civilian Conservation Corps built camps and trails that gave Americans access to the outdoors. Now, there are more than 5,000 state parks, nearly ninety-five times the number of national parks.
